Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner and applicant discussed their interpretations of the "and distinguishable from other selected key frames" from independent claim 1. The examiner told the applicant that he believed Crinon disclosed this feature in column 8 lines 53-61 and also the abstract. The applicant explained that his invention compares key frames against other key frames and he said he would consider amending the claims to more distinctly claim this feature. The applicant also stated that he would show the examiner where this is located in the specification. .
